

User Manual

1. Example of making a proper json file to plot the clusters

- Before the cluster is plotted

- After the cluster is plotted

The .json file should be written like this:

```
{  
  "cluster 1" : ["C7","LACR","STER","RACR"]  
}
```

The order of the Markers' names should be in the order you want them to be connected.

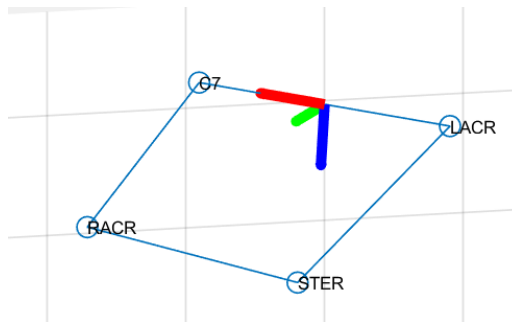

2. Example of making a proper json file to plot the coordinate system

for each cluster

- Before the coordinate system is plotted

- After the coordinate system is plotted

The json file should look like this

```
{  
  "cluster 1" : ["C7","LACR","STER"]  
}
```

The Markers' name inside the array are the reference markers that you are going to use to plot the coordinate system. There should be three and only three markers as reference markers for each cluster
